

GOLDEN LINK

The excitement of the game is brought to new heights with the release of the new multilevel progressive jackpot by CT Gaming. Golden Link is an innovative Jackpot that makes the player willing to get more while expecting to hit the levels. The Jackpot levels could be won at any bet.

GOLDEN LINK

Golden Link is connected to four games with a 5x5 layout. All the games are carefully selected to appeal to the players' tastes, being among the most preferred from CT Gaming's rich portfolio. All the symbols in the games can convert to golden symbols during the game.

Each golden symbol on the screen is collected in a Bonus chest. When 10 to 14 golden symbols appear on the screen simultaneously, the chest opens, and Bonus winning is paid off. The other two levels of the Jackpot are Major and Mega. When 15 to 19 golden symbols appear, the Major level is hit. If 20 or more precious symbols show up in the game, the Mega Jackpot is won.
